PERSONAL PROJECTS

- Residential Society Management Application**
Role : Salesforce Developer
 - Designed and implemented a robust data model using custom objects, fields, and relationships to store information such as members, amenities, maintenance requests, and bookings.
 - Utilized Apex Triggers and Process Builder for sending email notifications to members for new maintenance requests and updating member records based on amenity booking statuses.
 - Developed Lightning Flows to streamline the amenity booking process, allowing members to select amenities, reserve bookings, and receive confirmation.
- Recruitment Management Application**
Role : Salesforce Developer
 - Designed and developed Data model, Relationships, Formula fields, Page Layouts, Validation rules, and Security model to streamline the recruitment process.
 - Utilized Lightning Flows and Apex Triggers to gather candidate information and send email notifications when updating candidate, job application records.
 - Designed Lightning App Home page with Reports and Dashboards.
- Developer Portfolio**
Role : Salesforce Developer
 - Developed and implemented Developer Portfolio using LWC components and Experience Cloud.
